PROPERTIES OF COMPONENTS: Adrius contains a carefully selected balanced composition of medicinal plants, which comprehensively affect the condition and functions of the reproductive system.

Tribulus Terrestris fruits extract has a general tonic effect, increases sexual desire and testosterone level, and improves the working of urinary system.

Withania Somnifera root and leaves extract has a testosterone –like effect, has a positive effect on spermatogenesis. The extracts have produced anti-stress and adaptogenic properties, eliminating psychogenic causes of infertility. It enhances testosterone synthesis and also increases sperm concentration and motility.

Mucuna Pruriens fruits extract is used to treat male infertility, nervous disorders and as an aphrodisiac. It helps to improve sperm production and motility as well.

Asparagus Adscendens root extract is an aphrodisiac and eliminates erectile disorders, such as erectile dysfunction, premature ejaculation and lack of sexual desire.

Royal Jelly contains proteins, amino acids, polyhydrides, lipids, enzymes, Vitamin B & Ascorbic Acid. It improves immunity, stimulates metabolism, promotes rapid recovery during exercise, reduces fatigue and irritability, and reduces manifestations of chronic fatigue syndrome. The effect on male sexual function is characterized by increased sex drive, testosterone levels and improved sperm motility.

Yohimbine HCl USP is used as an aphrodisiac and for erectile dysfunction. It is effective in both organic and psychogenic forms of erectile dysfunction.

RECOMMENDATIONS FOR USE: Adrius can be recommended for normalization of men's reproductive system functioning. It contributes to increased physical endurance and improves the erectile function and spermatogenesis.*
